

Lake County Food Establishments, Food Suppliers and Members of the Public:

The Lake County Environmental Health Department will be establishing a Food Safety Advisory Group in the coming months. The purpose of this group is to facilitate communication between this department and the community. A variety of topics such as food safety information, programs encouraging excellence in food safety, and legislative changes affecting the food industry will be discussed.

The committee will be comprised of members of the public, food service industry, County and Tribal Environmental Health Department, Lake County Board of Health and MSU Extension. The group will meet bi-monthly for approximately 1 to 2 hours.

If interested in being a part of this group, please return the attached form to this office by **November 10th, 2009**.
